

Nike SasQuatch SUMO 460

Contributed by Bryan Spitzer
Friday, 20 June 2008

Having won the Golf Digest Editor's Choice for drivers in 2006, it was no doubt a challenge to improve on the original all titanium SasQuatch driver. What made the original great, makes the new SasQuatch Sumo even better - a new NIKE PowerBow geometry results in a higher MOI of 4950g cm² vs. 4650g cm². Therefore, SasQuatch Sumo delivers even more distance and forgiveness.
