Reengineered for longer distance, enhanced control and workability. Featuring new Power Transfer Technology combined with multi-component construction and softened urethane cover, NIKE ONE Platinum redefines total performance.

- PROGRESSIVE DENSITY CORE: Superior feel and longer distance off a wider range of clubs
- POWER TRANSFER LAYER: Increases ball speed for improved distance off metal woods, long irons and off-center hits
- INNER COVER: Optimized inner cover enhances mid-iron control and workability
- SEAMLESS URETHANE COVER: Exceptional feel, consistency and short iron spin
- IMPROVED 378 DIMPLE PATTERN: Redesigned aerodynamics for added carry and longer distance
